Dear City Leaders:

Subject: Rezoning of a Partial of Golfcrest Country Club

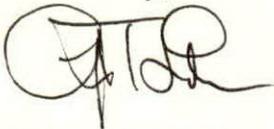

I have been out of town several weeks and have noticed that your first actions have been taken in the rezoning of a partial of Golfcrest Country Club.

I am not opposed to this rezoning in the event that the potential disaster to my family and several other families living on Green Tee Drive is eliminated. I am enclosing pictures recently taken after only 2-1/2 inches of rain. As you can see by these pictures, an entire sheet of water falls to our homes, coming from the proposed rezoning area.

We believe that this rezoning should be treated in the same manner as a new development, and that the developer should be made to hold water in the same manner that new developers are made to hold water. The rezoned property will cover a substantial drainage area and a substantial holding area, and we feel that the plans submitted to the City should not be approved without a plan to keep this horrible sheet of water from rushing towards our homes.

I hope you will give this your utmost consideration, and I am thanking you in advance.

Sincerely,

Glenn T. Lillie

Dear City Leaders,

Regarding the rezoning of part of Golfcrest Country Club, I am concerned with the potential disaster to my home and several other homes on Green See Drive. My home is already in danger of water rushing from the Country Club area. The rezoned property will cover a drainage area and holding area that will cause more

water to rush toward  
our homes. We feel the  
developers should indemnify  
homeowners that they will  
hold water in the same  
manner as developers in  
new areas so that our  
homes will not be flooded.

Sincerely,

Jonna Elliott
